

Klove Radio Station is the ONLY radio station my family listens to. We have it on in both of our cars and every radio inside our home. It is encouraging and uplifting. And I don't have to worry what is being broadcast over the air that my children hear. They also give important information of local gatherings and social events. I also support them with monthly pledges that keep them on the air. With all that is going on around the world at this time, I believe we need more positive stations around like KLOVE.
